Clever Time

Modelway srl

Ilario Gerlero

Engineering company developing innovative Machine-Learning methods for control, virtual sensing and modeling of complex systems

Who we are

- Founded as academic spinoff of Politecnico di Torino
- Experienced in applying **Machine-Learning methods** to solve technological problems in relevant **automotive and energy applications**
- Our mission is to produce the most **innovative virtual sensors** for the control of complex systems
- Provide **bespoke embedded systems** integrated with customers' value chain

What we do

MODELING

VIRTUAL
SENSOR

CONTROL

Machine Learning Methods for IoT applications

AUTOMOTIVE

INDUSTRY 4.0

ENERGY
&
ENVIRONMENT

Competitive benefits

- 4x reduction of time&cost in design and calibration
- 10x improvement in accuracy

What we are working on

Growth

Increase network, business prospects and projects portfolio

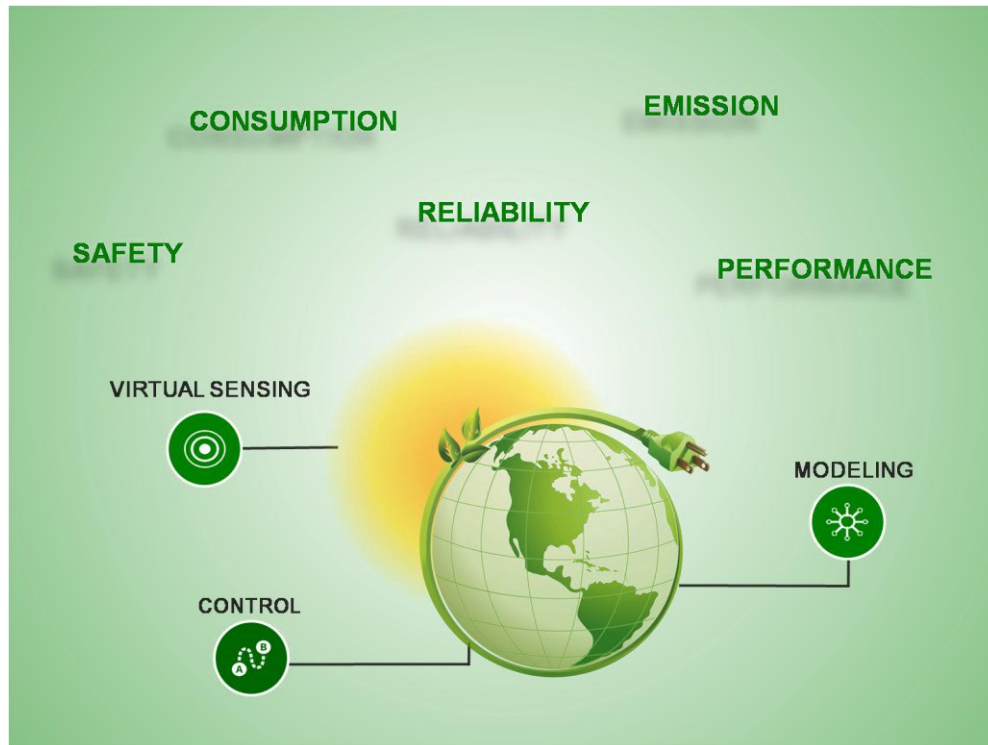

Focus

Penetrate most attractive markets, such as the Automotive and Industrial Process market with our virtual sensing technology

Scale

Partner up with established industry players to execute technology development plans
